## About Me

I am a passionate Full Stack Developer, with a strong background in a similar position. I am well versed in developing in the **.NET Framework**, and using languages like **C, C++, C#** and VB. I also have an advanced understanding of SQL (MySQL and especially MSSQL) as well as knowledge in Database Design. I've used **Python, Java** and **Javascript** (backend with Node.JS) for different personal projects, such as discord bots and desktop apps. I am very comfortable with the **Unity Game Engine** (and C#) with experience both in desktop games as well as mobile. Lastly, I've used **HTML/CSS/JS** to create websites, either for academic purposes or personal purpose.

Being a Technology based **Sales Representative** at **Plaisio**

## Hobbies

- Programming, Coding And App Development
- Playing & Developing Games

**Computers**, as well as having a huge interest in keeping up with new technologies, I have both a broad and deep understanding of hardware in the PC and Networking space.

My ambition is learning and understanding as much as I possibly can with every aspect of technology, whether it's hardware, software and everything in-between.

- Digital And Pixel Art
- PC Building And Upgrading
